PRODUCT DETAILS

Berg Go² Sparx Yellow

BERG has developed a foot-to-floor ride-on car specially for the very young. The GO2 is a foot-to-floor and pedal car in one and is suitable for children aged between 10 and 30 months. On this foot-to-floor car, children can learn to step and go-kart at an early age. The GO2 helps your little one develop their motor skills. The 4 wheels make this foot-to-floor car extra stable and safe. Pedals that fold in and out, 4 silent noise-reducing tires that can't go flat, a direct drive system that makes driving around really easy, an ergonomic design, and a sturdy saddle. The BERG GO2 foot-to-floor car has it all!

Foot-to-floor and pedal car in one

A foot-to-floor car gives your child the chance to gain experience with go-karting. Your child can

begin sitting on the GO2 with the pedals folded up. The next step is to simply fold the pedals out. With their feet on these pedals, your child can then practice learning how to pedal. By switching between stepping and pedaling, your child quickly develops, and before you know it, they'll be driving around in a cool car! Stable & safe

Due to the four wheels, the BERG GO2 stands firmly on the ground and has excellent stability. So the smallest kids can scoot around safely on their cool foot-to-floor car. With one less wheel, three-wheelers create a very unstable construction that tips over easily. Turning a sharp corner on a three-wheeler makes for a dangerous situation. With the GO2 foot-to-floor car, you can let your child ride around the home carefree!

Safe playing enjoyment

The uncluttered ergonomic design provides safe playing enjoyment. The foot-to-floor car is developed so that your child's feet can't come in contact with the pedals or rear wheels. Not even when the pedals are folded out. The textured saddle lets your child sit further back without sliding off! This way, the GO2 grows along with your child, so that they can enjoy their foot-to-floor car for longer.

Accessories

The BERG foot-to-floor car can be enhanced with many great accessories. Want to help your child along with a push? Then complete your BERG GO2 with the BERG GO2 push bar. This will easily help your child on their way. The push bar is easy to fit on the rear. Does your child prefer to step all by themselves? Then simply remove the push bar. Berg also has developed a safety flag for extra safety and visibility. So you never lose sight of your child. Is your child too tired to ride around on the BERG GO2? Then simply carry the car on your shoulder with the carry strap

Key Features:

- Learn to scoot and pedal with the BERG GO². In short, 2 in 1!
- 10-20 months; Thanks to its narrow rear design and folding pedals when tucked away, children quickly learn to scoot and steer.
- 20-30 months; Ready for the next step? Fold-down the pedals so that your child can learn to pedal.
- Extremely stable thanks to the wide front. The narrow rear enables you to scoot easily.
- The award-winning ergonomic design makes the GO2 an eye-catcher in the house.
- Grows along with your child without having to adjust the saddle.

- Silent whisper tires to ride around quietly and which never go flat.
- Supple and light to ride, both forwards and backward, thanks to the ball bearings in the crank axle and rear axle.
- Suitable for push bar; Help your child get started!
- Suitable for a safety flag; the GO2 will be more noticeable.
- Suitable for shoulder strap; Makes the GO2 easy to take with you.
- Available in 5 cool color combinations.
- Suitable for children aged 10-30 months.

Maximum User Weight

20 kg
