PRODUCT DETAILS

Garlando Zodiac Air Hockey

The rounded profile of this air hockey table, with no sharp edges, is emphasised by the convex legs, giving the table an original and attractive appearance. The neat black and aluminium combination coats a very sturdy and stable structure, which makes this product suitable for use by collectivities.

The playing surface with fine geometrical by-colour patterns is the ideal background for fast and dynamic competitions, which will develop the players' concentration power, quick reflexes, and movement coordination.

Key Specifications:

- 18mm thick MDF cabinet, with bump-resistant laminate PVC coating, alternating black and aluminium.
- 8mm thick MDF legs with a coating in black laminate PVC and chromium-plated feet with an original square profile. Legs are strengthened by cross panels, bringing the table the necessary stability.
- Handrails in MDF coated with black laminate PVC and PVC aluminium corners, both laminated for an anti-scratch and anti-bump effect.
- The 2.5 mm thick playing surface has a white PVC background with attractive geometrical red and blue decorations. This material is scratch-resistant and bump-resistant, and easy to maintain and clean.
- Quick and easy puck recovery through an exit behind each goal.
- The display, with an original design, is placed on the handrails and bears an electronic score counter to mark goals.
- The score counter is programmed with the modality "sound" (uttering a sound each time a goal is scored).
- Packing with strong protection inside the carton, to prevent the table from suffering damage during transport.
- The playing surface has several small holes to convey the air flux produced by a powerful blower. The air comes out at constant pressure, creating a uniform air cushion.
- High-performance blower below the playing surface, with an electrical connection at 220V-240V/50-60 Hz and an ON/OFF switch button to switch the machine on and off.
