PRODUCT DETAILS

HMS 200cm Regular Straight Bar

GPR HMS is a straight bar on star clips. To ensure a secure and comfortable grip, the gripping part is carefully knurled. The set also includes two screw clips.

Clips of this type provide a stable position of the weight during exercise. The clips have rubber seals to prevent them from loosening unintentionally. The loading part of the bar is threaded, this allows quick and safe weight loading.

Made of steel, which has also undergone a hardening process, this barbell is very durable and reliable. The diameter of the neck is 30mm which is perfect for regular weight plates. The barbell has undergone a chrome plating process which guarantees it to keep its appearance for a very long period of use. The chrome plating provides also the best protection against rust.

Key Features:

- Material: hardened steel
- Gripping part finishing: knurled
- Corrosion protection: chrome
- Clamps: star shaped
- Number of clamps: 2 pieces
- Load locking sleeve thickness: 10 mm
