PRODUCT DETAILS

The Toorx rower RWX 300 incorporates various features, including the **motorized 16-level resistance system**, the air magnetic rower provides a versatile and customizable workout. Users can enjoy cardiovascular conditioning, muscle strengthening, calorie burning, and overall improvement in endurance and fitness levels. The rower's compatibility with fitness apps adds motivation, variety, and tracking capabilities to enhance the training experience.

Air Magnetic Rower: The rower combines air and magnetic resistance mechanisms to deliver a smooth and challenging workout experience.

5kg Flywheel: The rower is equipped with a 5kg flywheel, providing consistent and realistic resistance that mimics the feel of rowing on water.

Max User Weight of 120kg: The rower is designed to support users with a maximum weight capacity of 120kg, accommodating a wide range of individuals.

Console LCD Screen: The rower features a console with an LCD screen that displays essential workout data, including time, distance, strokes per minute, calories burned, and heart rate. Users can monitor their progress and make adjustments as needed.

Smartphone and Tablet Support: The console includes a holder that supports smartphones and tablets, allowing users to conveniently access and view fitness apps or entertainment during their workouts.

Motorized Resistance with 16 Levels: The rower features a motorized resistance system with 16 adjustable levels. This allows users to easily change the intensity of their workouts at the touch of a button, providing a wider range of resistance options and precise control over the difficulty level.

Heart Rate Monitoring: The rower is equipped with a built-in wireless wrist receiver for heart rate monitoring. Users can wear a compatible heart rate monitor (not included) and track their heart rate on the console's display. This enables efficient heart rate-based training and helps users stay within their target heart rate zones.

App Ready Built-in Bluetooth System: The rower includes a built-in Bluetooth system that enables it to interact with various fitness apps through compatible devices. This feature allows users to connect their rower to motivating fitness apps, providing access to training programs, workout videos, virtual challenges, and more. The rower's compatibility with the Kinomap fitness app (subscription not included) offers an additional interactive and engaging training

experience.

Kinomap Compatibility:

The compatibility of the air magnetic rower with the Kinomap fitness app allows users to enhance their workout experience and access additional training resources. Here's further information about the compatibility and features of the Kinomap fitness app:

Interactive Training: The Kinomap fitness app provides a unique interactive training experience. It offers a vast library of high-definition videos recorded from real outdoor routes and indoor training sessions. These videos are geolocated and synchronized with the rower, allowing users to virtually row in various scenic locations or participate in guided indoor workouts.

Virtual Challenges: Kinomap offers virtual challenges where users can compete against other Kinomap users or their own personal records. Users can set goals, track their progress, and challenge themselves to beat their previous performances. This feature adds an element of gamification and motivation to the workouts.

Training Programs: The app includes a wide range of training programs designed to help users achieve specific fitness goals. These programs cater to different skill levels and objectives, such as endurance training, interval training, or weight loss programs. Users can choose programs that align with their goals and follow structured workouts to maximize their training effectiveness.

Performance Tracking: Kinomap allows users to track their workout data, including distance, time, speed, calories burned, and stroke rate. This information is displayed on-screen during the workout and can be saved for later review and analysis. Tracking progress helps users monitor their improvements and adjust their training accordingly.

Sharing and Social Features: Kinomap provides a social platform where users can share their workouts, achievements, and progress with a community of fitness enthusiasts. Users can also follow others, participate in challenges, and interact with fellow users through comments and likes.

App Integration: The air magnetic rower featuring built-in Bluetooth connectivity can be seamlessly integrated with the Kinomap fitness app. Users can connect their rower to the app on their smartphones or tablets, allowing the rower's performance data to sync with the app in real time. This integration provides a more immersive and interactive training experience.
