Toorx Bike BRX-AIR-5000 Air Bike

A professional-grade air resistance exercise bike designed for intense cardio workouts and full-body training sessions. Featuring an advanced air braking system, the resistance automatically adjusts according to the user's pedalling intensity, delivering a smooth and highly responsive training experience suitable for both beginners and advanced athletes.

Built with high-quality commercial components. The robust steel frame supports a maximum user weight of 150 kg, ensuring excellent stability and durability during high-intensity interval

training and endurance sessions.

The console features a clear blue backlit LCD display showing essential workout metrics including time, speed, distance, calories, pulse, RPM, Watt, and recovery functions, helping users monitor performance and progress effectively. Multiple training programs and interval functions allow for versatile and motivating workouts.

Integrated Bluetooth FTMS connectivity allows compatibility with popular training apps such as Kinomap and Zwift, creating a more immersive and interactive workout experience. Transport wheels and leveling feet complete the professional design, making the BRX-AIR-5000 a reliable and versatile cardio solution for high-performance training environments.
