## PRODUCT DETAILS

- With 2 years warranty parts and labour

### Toorx BRX-R65 Comfort

The exercise cycle is equipped with a 7 kg flywheel; this flywheel will allow for a fluid and silent movement. The braking of the cycle is magnetic, with manual adjustment of the manual effort on 8 levels. The frame has a weight of 29.5 kg, is guaranteed a maximum capacity of 110 kg, synonymous with stability and robustness.

The adjustment of the seat advancement is important, which will allow the user to find the most comfortable and suitable position for his needs. The exercise cycle is equipped with an LCD display that displays basic data such as time, speed, distance, calorie consumption and heart rate detection, using the appropriate manual sensors.

Once the workout is finished, you can move the exercise cycle comfortably using the wheels located on the base of the tool.

**Key Features:**

- Hand pulse.
- Max user weight 110 kg.
- Magnetic braking system

**Benefits Of The Product:**

Cycling is an excellent way to get your heart pumping. Cardiovascular or aerobic workouts, such as cycling, strengthen your heart, lungs, and muscles. They also improve the flow of blood and oxygen throughout your body. This, in turn, can benefit your health in a number of ways, including: improved memory, lower blood pressure, improved blood sugar levels, lower stress levels and much more.

A stationary bike workout is a low-impact workout that uses smooth movements to strengthen bones and joints without putting much pressure on them. This makes it a good workout option for people with joint issues or injuries.

Your ankles, knees, hips, and other joints can be put under a lot of stress when running, jogging, jumping, or doing other high-impact aerobic exercises.

Because your feet don't lift off the pedals with a stationary bike, this option is kinder to your joints, but it still provides a challenging and effective workout.
