- With 2 years warranty parts and labour

Toorx Rower RWX-500

Tension Adjustment
This rower has a 16-level tension control motorized adjustment, this makes it very easy for a user to change the resistance during working out. The braking system is magnetic which makes rowing very quiet and smooth. With magnetic braking and motorized resistance adjustment, this rower is perfect for home use.

Console
The console is a blue backlight LCD display that displays your data in real-time. Functions such as strokes/min, total strokes, calories, time, distance, and pulse are all displayed on the console.

The rower also comes with pre-set programs which are: 500/TM, Watt, 4 HRC, Recovery, Manual, Race and includes 12 pre-set programs. The console allows you to create 4 user profiles.

Features
A heart rate wireless pulse receiver is built into the rower for measuring your heart rate while working out. The foot platforms have straps that allow you to strap your feet for more stability during rowing. The seat is designed to be ergonomic and anatomically comfortable.

Frame
Built with high-quality materials this rower can support a maximum user weight of 130 kg. Featuring aluminum sliding rails for extra durability. A 9 kg flywheel is also added to this model which allows for ample resistance when training at home. Designed with the idea to be space-saving, this rower is also foldable. You can easily fold up and move, thanks to built-in transportation rollers, your rower in order to save up space when not in use.

Chest Strap
An optional heart rate chest strap can be linked to the rower to display your heart rate while working out. Sold separately

Key Features:
 4 different user profiles
 Motorized with 16-level tension control
 Roller seat sliding on aluminum rail
 Blue backlight LCD display
 Smartphone/tablet holder included

Benefits Of The Product:
Rowing machines, also known as ergometers or ergs, use both your upper and lower body on every stroke.

This, in turn, strengthens and tones your muscles and improves your endurance. Plus, rowing provides some surprising benefits for your heart and lungs.

It s a common misconception that rowing works only your arms. In reality, rowing is a full-body workout.

The major muscle groups it targets are your quadriceps, calves and glutes. Rowing is also known to strengthen your upper body muscles, including your pecs, arms, abdominal muscles and obliques.
