TOORX AIR ROWER RWX-AIR-5000

The **TOORX RWX-AIR-5000** is a professional air resistance rowing machine designed to deliver a smooth, fluid and realistic rowing experience, simulating the feeling of rowing through water. With 10 adjustable resistance levels, it allows users to customise the intensity of their workouts to suit different fitness levels and training goals.

Equipped with an adjustable-angle, blue backlit LCD console, the RWX-AIR-5000 displays essential workout data, including strokes per minute, calories burned, time, distance, distance per stroke, time per 500 metres and heart rate. It also features multiple training programmes, including game, time, distance, calories, three interval programmes and a user programme,

providing variety and flexibility for every session.

The comfortable rowing seat, fitted with roller bearings, glides smoothly along an aluminium rail, while the ergonomic footrests feature adjustable lengths for a secure and comfortable rowing position. The built-in wireless heart rate receiver allows users to monitor their heart rate during training with a compatible chest strap.

For an enhanced workout experience, the RWX-AIR-5000 features integrated Bluetooth FTMS connectivity, making it compatible with fitness apps such as Kinomap, EXR and HOLOFIT. A convenient smartphone and tablet holder keeps devices within easy reach, while transport wheels make repositioning the machine easier.

Built for professional use, the TOORX RWX-AIR-5000 combines performance, durability and advanced training features, making it an excellent choice for commercial gyms and demanding fitness environments.
