PRODUCT DETAILS

Toorx WBX-200

Toorx Adjustable Bench WBX-200 This multi-adjustable bench features a carry handle and transportation wheels for easier movement. This allows you to move the bench from station to station easily and without wasting time. The saddle of the bench is also adjustable on 4 levels, from 0-22.5°. The backrest is also adjustable on 6 levels, from (0-85°).

The frame is made out of heavy-duty steel tubing 70x50 mm and is double-coated with heavy-duty powder for a scratch-resistant finish. The maximum loadable weight is 320kg which makes this bench perfect for commercial gyms or even at home.

With a wide backrest and saddle, this bench provides a very stable platform when performing heavy exercises. For more stability, the bench was designed with large metal feet.

Key Features:

- Transportation rollers
- Adjustable

Benefits Of The Product:

The bench press is an exercise that can be used to tone the muscles of the upper body, including the pectorals, arms, and shoulders.

There are different variations of bench presses that work slightly different muscles for example, the triceps and the forearms are emphasised more with a narrower grip.

Other benefits of including a pressing movement to your weight-training plan include increasing upper body strength and improving muscular endurance.
